When you order adhesive film for existing glass, remember the following: leave film 4mm (0.16 inch) smaller than the glass surface on each side to ensure it fits and there is room for the silicone sealant. If ordering laminated glass talk to us about final thickness, cut, if you need any holes, etc. Ensure surface is perfectly clean of any imperfections or dust particles before starting to apply adhesive film, and as you work to apply it. Production takes 7-14 days. Film ships in 7-14 days after production. Glass is generally shipped by sea (wood crates) add approx. 35 days or air by request.

Complete Measurements and Details (if you need more space, add additional sheets)
